Completed

Experience

University Project:

Remote

E-commerce Platform
Development for real client

Team Lead and Full-Stack Developer

Jan 2024 – Dec 2024

- Led the project through all stages, including planning, design, development, and deployment, ensuring timely delivery and quality standards.

María Fernanda Sánchez Valverde

- Created with the team comprehensive technical documentation, including requirements, user stories, diagrams, schedules, and reports.
- Collaborated with the team to ensure a seamless integration of functionalities and provided support during testing and debugging.
- Designed and implemented user-facing product modules, enhancing user satisfaction by enabling seamless filtering, sorting, detailed product views, etc.
- Developed user modules, including login, registration, profile editing, purchase history, and client reviews.
- Built an admin dashboard for managing inventory, user accounts, product categories, and order statuses.
- Delivered a modern and responsive front-end design for both the user interface and the admin dashboard.
- Conducted extensive testing and deployed the application to a testing environment using Azure.
